

CHECK ENGINE LIGHT CHECKLIST

WHILE A GLOWING CHECK ENGINE LIGHT DOESN'T MEAN YOU HAVE TO PULL OFF THE ROAD IMMEDIATELY, YOU SHOULD GET THE CAR CHECKED OUT AS SOON AS POSSIBLE. IF THE LIGHT FLASHES, THE CONDITION IS MORE CRITICAL AND MUST BE CHECKED SOONER. COMMON CAUSES CAN INCLUDE A FAULTY OXYGEN SENSOR, MASS AIR FLOW SENSOR, OR SPARK PLUGS AND WIRES. WHEN SCHEDULING SERVICE, MAKE SURE THE REPAIR SHOP HAS PROFESSIONAL TECHNICIANS TRAINED AND CERTIFIED IN DIAGNOSIS AND REPAIR. FOR FURTHER ILLUMINATING FACTS, SEE THE CAR CARE COUNCIL AT CAR-CARE--DOT--ORG.
