

# Did You Know?

(NAPS)—Businesses thrive with game-changing connectivity. You can rely on your local cable provider for dependable, affordable and secure local support. Learn more about what cable has to offer and how to connect with a provider by visiting [www.businessservicesconnect.com](http://www.businessservicesconnect.com).

Famed science fiction authors and judges of the L. Ron Hubbard Writers of the Future contest and professional instructors offer aspiring writers a free online writing workshop. Learn more at [www.writersofthefuture.com/register/online-workshop](http://www.writersofthefuture.com/register/online-workshop) and [bit.ly/WOTFWorkshop](http://bit.ly/WOTFWorkshop).

A recent poll by EdChoice and Morning Consult reveals how parents and teachers say the pandemic has affected their lives and their children's K-12 education. Learn more at [www.edchoice.org](http://www.edchoice.org).

A well-designed sink such as the IKON 33" Apron 1¾ bowl with low divide can keep your kitchen safer. It's made of scratch resistant, nonporous SILGRANIT that's easy to clean. The company's hands-free faucet is another safety idea. Learn more at [blancoamerica.com](http://blancoamerica.com).

If you and your family plan to move soon, you'll be pleased to know that moving is considered an essential service by the federal government. For further information, go to [www.moving.org](http://www.moving.org) and follow @amsapromover on social media. Reliable Internet connectivity is more important than ever. If you move to a new home, SmartMove can connect you to your provider and arrange new Touchless Installs that let you safely connect your tech services yourself.

A new report from the U.S. Pharmacopeia and the MIT Center for Collective Intelligence explores the next 20 years of medical innovations and how trust can impact our health. Read it at [www.usp.org/trustorconsequences](http://www.usp.org/trustorconsequences). Share your opinion using #Trust Tomorrow. Learn more at [usp.org](http://usp.org). Older shoppers can save big on groceries with Healthy Savings, a new program powered by AARP Foundation, that lowers

costs and identifies healthful options right in the store. More information, including recipes and tips for shopping smart, is at [www.aarpfoundation.org/save](http://www.aarpfoundation.org/save). Two common health issues of cattle are foot rot and pinkeye. Caught early, they can be treated easily with a non-prescription injectable oxytetracycline product called Noromycin 300 LA. Learn more at [www.norbrook.com](http://www.norbrook.com).

A battery that runs on air—and zinc—can store energy from renewable resources and bring about a cleaner, safer, healthier world, according to Zinc8 Energy Solutions, the leader in zinc-air battery technology. Zinc8 Energy Solutions trades in Canada on the CSE under the ticker symbol ZAIR and in the U.S. under the symbol MGXRF. Learn more at [www.zinc8energy.com](http://www.zinc8energy.com).

A well-organized and appointed kitchen may help you cook better—and enjoy it more. For example, the new IKON 33" Apron from BLANCO has a convenient low divide and is made with nonporous, easy-to-clean SILGRANIT composite in eight trending colors. Learn more at [blancoamerica.com](http://blancoamerica.com).
