Protecting The Earth

(NAPSA)—Popular animated hero Ben Tennyson (aka Ben 10) has just been given a new mission: starring in a video game. Based on the Emmy-award-winning “Ben 10” television series from Cartoon Network, the game is easy for novice players to pick up, appropriately challenges and rewards young gamers, yet offers a wide variety of powerful action choices that make it exciting enough to engage players of all levels for hours at a time.

A popular animated hero with alien powers is now starring in his own video game.

Ben uses the power of an alien device called the Omnitrix, which enables him to transform into different alien beings, each with unique powers and abilities. Ben uses superstrength and velocity and manipulates fire and more to defend the world from evildoers from Earth and space and defeat his archenemy, Vilgax.

“Ben 10: Protector of Earth” provides solid and robust gameplay appropriate for a wide range of ages and offers single-player and multiplayer styles of play. Developed by D3Publisher of America, it is available for Nintendo Wii, PlayStation 2, PSP and Nintendo DS wherever video games are sold.
