Winston Deserves An Active Life!

(NAPSA)—There's good news for pet parents looking for a way to soothe their pet's aches and pains. For over 20 years, pet parents have relied on ArthriSoothe-Gold Advanced Joint Formula to help keep their pets healthy and active. But NaturVet has taken ArthriSoothe-Gold to the next level by conducting a double-blind, clinical trial to ensure pet parents that ArthriSoothe-Gold is the best solution for their pet.

Keeping Winston active can be easier with a supplement designed to support advanced canine joints.

Now, clinically tested ArthriSoothe-Gold can help increase activity and alleviate aches and discomfort associated with daily exercise.

The dogs in the treatment group had significantly more activity and an average decrease in pain of more than 30 percent. There were no adverse events or product-related safety concerns. In fact, over a million doses have been administered since 1994 with no significant adverse events.

ArthriSoothe-Gold is available in time-release tablets and tasty soft chews. Manufactured by Garmon Corp., in Temecula, Calif., U.S.A.
